E-COMMERCE VS RETAIL

Enter your sub headline here

E-Commerce

E-Commerce (or online business) is a method where customers buy a product from a website and make transactions through the internet. In the e-commerce method, customers can browse through several products available in stock and order them as per their needs.

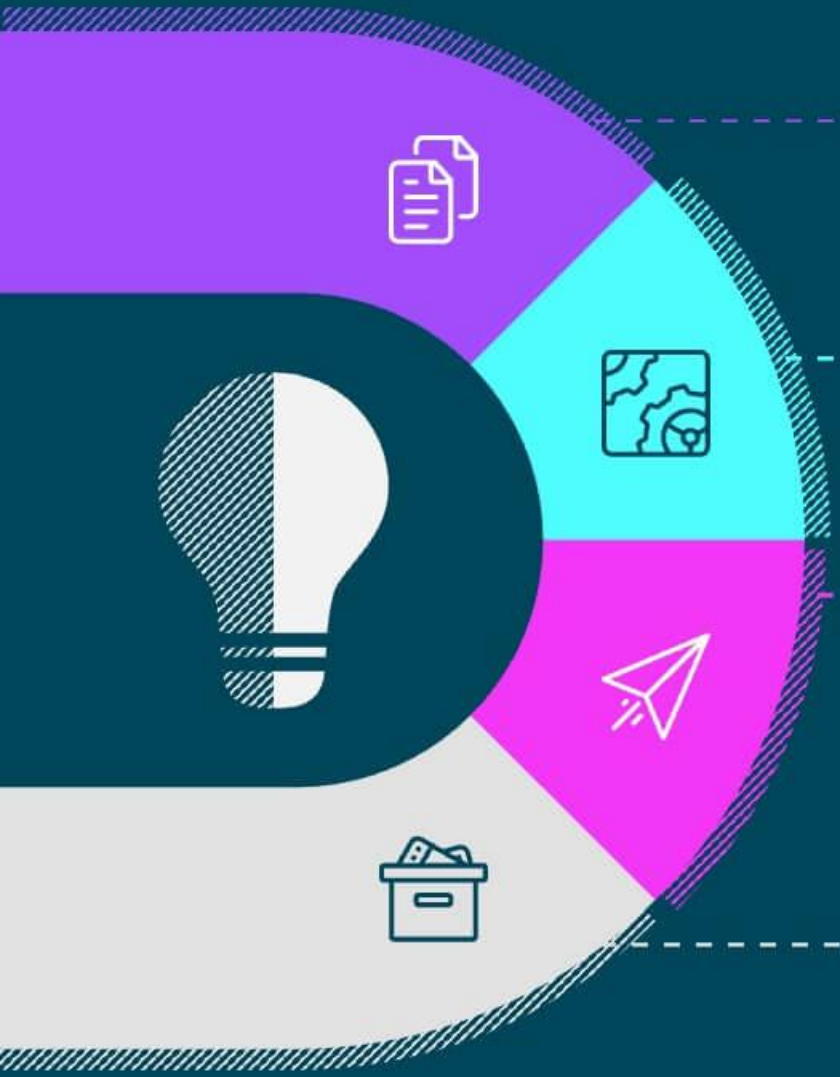

Retail

Retail (or offline business) is a method where customers purchase products & make transactions at a physical store. Brick-&-mortar stores, shopping complexes, malls, supermarkets, etc. In retail shopping, customers can physically interact with the products and select one from the available options in the store.
